## Introduction

The data contained in this publication were obtained from Statistics Canada. They result from the Census of Agriculture, which was conducted on May 14, 1996.

Tables are presented for selected variables on agriculture for counties, improvement districts and municipal districts in Alberta, and are summarized by agricultural administrative region (South, Central, North East, North West and Peace). Regional totals may not add up to the provincial total due to (1) the confidentiality of data for some municipalities where marked by an x, and (2) data for some Indian reserves included in the provincial total could not be identified at the municipality level, therefore not included in regional totals.

In addition, a regional map, Alberta municipalities classified by region, census definitions and notes are provided.

Comments or questions regarding the data should be directed to:

## Census Definitions and Notes

### *General Notes*

#### Conversion Factors

1 acre = 0.404 685 6 hectares
1 hectare = 2.471 acres
1 square foot = 0.092 903 04 square meters
1 square meter = 10.763 91 square feet
1 kilogram = 2.204 622 6 pounds
1 pound = 0.453 592 4 kilograms

#### Rounding

Totals may not equal the sum of their parts due to the use of conversion factors or the rounding of fractions to whole numbers.

#### Amalgamations

Due to confidentiality constraints, data for subdivisions with very few farms were combined with data from adjacent areas. In most cases, the name of the amalgamated subdivisions is identical to the largest component of the amalgamation.

- Ranchland M.D. No. 66 refers to: Crowsnest Pass, Improvement Districts 5, 9 and 12 and Ranchland M.D. No. 66;
- Starland M.D. No. 47 refers to: Badlands M.D. No. 7 and Starland M.D. No. 47;
- Bonnyville M.D. No. 87 refers to: Wood Buffalo and Bonnyville M.D. No. 87.

**Data are Not Available for:**
(due to minimal or no agricultural activity)

- Improvement District No. 4 (Waterton Park)
- Improvement District No. 13 (Elk Island)
- Jasper Improvement District, Improvement Districts 5, 9 and 12;
- Improvement District No. 24 (Wood Buffalo Area);
- Improvement District No. 25 (Willmore Wilderness Park).

#### Headquarters Rule

Many agricultural operations in Canada are composed of numerous parcels of land in a number of locations. These different locations are often situated in several geographic areas (such as townships or counties). In these situations, the "headquarters rule" assigns all data collected for the agricultural operation to the geographic area where the farm headquarters is located.

#### Incompletely Enumerated Indian Reserves and Indian Settlements

Some Indian reserves and Indian settlements were incompletely enumerated in 1996, as enumeration was either not permitted or was interrupted before it could be completed. As a result, it was not possible to identify any census farms on these particular reserves and settlements. The impact of the missing data is very slight at the larger geographic levels (Canada and province), but the impact is more significant for those census divisions and census consolidated subdivisions in which the affected reserves and settlements are located.

For more information and a list of the names and locations of the 77 incompletely enumerated Indian reserves and Indian settlements, please refer to Statistics Canada's publication: *Population and Dwelling Counts*, Catalogue No. 93-357-XPB.

### *Definitions*

#### Farm

A census farm is an agricultural operation that produces at least one of the following products intended for sale: crops (field crops, tree fruits or nuts, berries or grapes, vegetables, seed); livestock (cattle, pigs, sheep, horses, exotic birds, etc.); animal products (milk or cream, eggs, wool, furs, meat); or other agricultural products (greenhouse or nursery products, Christmas trees, mushrooms, sod, honey, maple syrup products).

#### Farm Capital

Farm capital includes the value of all farm land, buildings, machinery, equipment (including passenger vehicles used in the farm business), and livestock and poultry. Respondents reported the values of their land,

buildings, farm machinery and equipment as at May 14, 1996. Value of livestock and poultry inventories reported in the Census were calculated using data on average farm prices for the various types of livestock and poultry. Farm capital does not include the value of crops in the field or in storage, or farm inputs on hand, such as fertilizer and seed.

**Farm Type**

A farm is classified according to the predominant commodity produced. This is done by estimating the potential gross farm receipts from the inventories of crops and livestock reported on the questionnaire. The commodity or group of commodities which account for 51 per cent or more of the total potential receipts determines the farm type.

"Grain and Oilseed" farm type includes the following farm types: oilseed, corn for grain, dry field pea and bean, and other small grain.

"Field Crops" farm type includes the following farm types: hay and fodder crops, forage seed for seed, tobacco, potato and other field crops.

"Miscellaneous Specialty" farm type includes the following farm types: sheep and lamb; goat; horse and pony; fur; other livestock specialty; mushroom; greenhouse products; nursery products and sod; maple; and Christmas tree.

"Livestock Combination" farm type includes cattle and hog farms; cattle, hog and sheep farms; and other livestock combination farms.

"Other Combination" farm type includes other field crop combination farms; fruit and vegetable combination farms; and all other types of farms.

**Gross Farm Receipts**

Farm receipts measure the gross revenue generated by agricultural holdings. They are not a direct measure of profit since operating expenses have not be deducted. The data for receipts were reported for the previous calendar year or for the last complete accounting (fiscal) year.

Gross Receipts include:

- receipts from all agricultural products sold
- marketing board payments received
- program and rebate payments received
- GST refunds received
- dividends received from co-operatives
- receipts from maple syrup and Christmas trees sales
- custom work and all other farm receipts
- forest products (firewood, pulpwood, logs, fence posts, pilings and standing timber).

Gross Receipts do not include:

- receipts from the sale of capital items (e.g. land, buildings or machinery)
- receipts from the sale of goods bought only for retail sales.

NOTE: Farm receipts data from the Census of Agriculture are not directly comparable with the similarly named series derived on an annual basis by Statistics Canada (published in Catalogue No. 21-603, "Agriculture Economic Statistics"). Census data includes inter-farm transactions, i.e., the value of agricultural products (livestock and poultry, seed and seedlings and feed) sold from one farm to another within the same province. The annual series excludes inter-farm sales.

**Hired Paid Labour**

Work done on the farm during the previous calendar year by persons 15 years of age and over, either on a year-round, seasonal or temporary basis. Work excludes housework, custom work and non-agricultural work. Agricultural and manpower researchers use data on hired labour to estimate and evaluate labour requirements and for planning training programs.

**Interest Expenses**

Refers to interest on operating debt and on all other debts (e.g., machinery or mortgage debt) for the previous calendar year or for the last complete accounting (fiscal) year. Interest expenses do not include payment of principal or amount of debt outstanding. Interest expenses as a percent of total expenses is used as a proxy for debt since actual debt levels are not reported in the census.

**Land Use in 1996**

- Total Land in Crops includes all areas reported for field crops, fruits, vegetables, nursery products and sod.
- Summerfallow includes idle land that has not been worked or sprayed for more than one year.
- Tame or Seeded Pasture (referred to as Improved Land for Pasture or Grazing in 1991) refers to land that has been cultivated and seeded, or drained, irrigated, fertilized or controlled for brush or weeds; does not include areas to be harvested for hay, silage or seed.
- Natural Land for Pasture (referred to as Unimproved land for Pasture or Grazing in 1991) refers to native pasture, native hay, rangeland, grazable bush, etc.
- All Other Land includes land on which farm buildings, barnyards, lanes, home gardens, greenhouses and mushroom houses are located; idle land; woodlots; sugarbush; tree windbreaks; bogs; marshes; sloughs; woodland; wetland; etc. All Other Land includes Christmas tree area.

**Livestock Inventory**

Includes all animals on the farm, regardless of ownership; and any animals owned but pastured on a community pasture, grazing co-op or public land. Livestock on farms exclude animals owned but kept on a farm, ranch or feedlot operated by someone else.

Livestock data from the census are used as the basis for annual estimates and for estimating inventories, production and future supplies of animals and animal products for domestic consumption and export. Farmers use census estimates to make production and marketing decisions while government departments, private companies and farm media use census information in market analysis and formulation of agricultural outlooks.

**Purchases of Capital Assets and Improvements**

Refers to purchases (without deductions of any grants or subsidies) and improvements made in 1995 or for the last complete accounting (fiscal) year. Includes any major renovations to farm buildings, purchases of new or used vehicles, machinery and equipment, any major land improvements or purchases of other capital assets such as land or quota. Includes all purchases which were jointly made with a different agricultural operation. Does not include expenditures made on the home, any repairs and maintenance expenditures and the GST.

**Quota**

A quota is an entitlement, or right, to sell or deliver a certain amount of an agricultural product (for example, milk, eggs or poultry) produced under supply management.

## *Notes on Census Definitions and Data*

**(1) Farm**

The definition of a census farm was expanded for the 1996 Census of Agriculture to include commercial poultry hatcheries and operations that produced only Christmas trees.

Over time, the definition of a farm has changed. In 1971 and 1976, a farm was defined as an agricultural holding of one acre or more with sales of agricultural products of $50 or more. In 1981 and 1986, the minimum sales requirement was increased to $250.

In 1991, a farm was referred to as a census farm, ranch or other agricultural holding which produces at least one of the following products intended for sale (no minimum sales requirement): crops, livestock, poultry, animal products, greenhouse or nursery products, mushrooms, sod or honey.

**(2) Net Farm Income**

Average Net Farm Income is equivalent to gross farm receipts minus operating expenses (less cash wages paid to family members).

**(3) Operating Arrangements**

The order and wording of the questions dealing with operating arrangements were changed in the 1996 Census because individual or family holdings were being over-reported. The changes introduced in the 1996 questionnaire contributed to an increase in the number of

operations that were reported as being legally incorporated compared with previous censuses.

**(4) Farm Type**

A farm is classified according to the predominant commodity produced. The commodity or group of commodities which account for 51 per cent or more of the total gross farm receipts determines the farm type.

**(5) Tame and Seeded Pasture**

The name and definition of tame or seeded pasture has changed from the previous census. In 1991, it was called "Improved land for pasture or grazing." Consequently, some respondents may have reported differently in 1996 than in 1991, thereby affecting the comparability of the data for those years.

**(6) All Other Land**

All other land includes land on which farm buildings, barnyards, lanes, home gardens, greenhouses and mushroom houses are located; idle land; woodlots; sugarbush; tree windbreaks; bogs; marshes; sloughs; etc.

For comparability with 1991 data, "All other land" in 1996 also includes Christmas tree area. Some operators reported unplanted land intended for crops as idle land (a component of "All other land") since at the time of the Census of Agriculture, they were uncertain as to whether this land would be planted. This situation only affected farms not included in the Progress of Seeding Follow-up.

**(7) Value of Farm Machinery and Equipment**

In 1991, agricultural operators reported the farm machinery and equipment located on their operations on Census Day, regardless of ownership. For the 1996 Census of Agriculture, operators were asked to report the present market value all farm machinery and equipment that they owned or leased on Census Day. This change in reporting limits the comparability of these data.

**(8) Value of Farm Land and Buildings**

Refers to the market value of land and buildings on the operation on Census Day. It includes the value of all houses which are part of the operation; the value of fixed equipment/machinery found in farm buildings on the operation. It does not include the value of any land and buildings rented or leased to others.

**(9) Farm Operating Expenses**

Refers to gross operating expenses of the operation in 1995 (calendar year) or for the last complete accounting (fiscal) year.

**(10) All Other Expenses**

The 1991 and 1996 data for "All other expenses" are not comparable because three expenditures that had been included in this expense category in 1991 (packaging materials, repairs and maintenance to farm buildings and fences, and insurance premiums) became separate categories in 1996.

**(11) Gross Farm Receipts**

Refers to gross farm receipts of the operation in 1995 (calendar year) or for the last complete accounting (fiscal) year.

**(12) Capital Asset Purchases and Improvements**

Refers to major renovations to farm buildings, purchase of new or used vehicles, machinery or equipment, major land improvements or purchase of other capital assets such as land or quota in 1995. Excludes expenditures made on the home, repair and maintenance expenditures and Goods and Service Tax (GST).

There has been some under-reporting of the amount paid for: new cars and other passenger vehicles used in the farm business; new farm trucks; new farm machinery and equipment; and used farm vehicles, machinery and equipment. This is primarily the result of respondents reporting the net value of a purchase (i.e., the amount paid minus any trade-in value) instead of the total amount paid.

**(13) Spring Wheat**

Spring wheat includes utility and prairie spring wheats.

**(14) Winter Wheat/Fall Rye**

Winter wheat or fall rye to be harvested in 1996.

**(15) Vegetables Grown for Sale**

Excludes greenhouse vegetables.

**(16) Herbicide/Insecticide/Fungicide Use**

Operators can apply insecticides and fungicides to the same land; therefore, the sum of the responses to these two 1996 questions is not comparable to the response to the single 1991 question which asked for the total area on which insecticides or fungicides were used.

The area of land that has been treated with herbicides, insecticides and fungicides is under-reported. Some respondents reported chemical expenses, but did not report any corresponding areas to which these chemicals were applied. Telephone follow-up with a sample of these respondents confirmed that some respondents had mistakenly reported for 1996 instead of 1995, as requested. This explained their response because at the time the questionnaire was completed in 1996, the chemicals purchased had not yet been applied.

**(17) Manure Application**

Operators may apply manure using more than one method of application on the same land. Consequently, the sum of the responses to the four 1996 questions concerning manure application methods is not comparable to the response to the single 1991 question which asked for the total area on which manure was applied.

**(18) Cattle and Calves**

The earlier census date in 1996 affects comparability with previous censuses due to the lower percentage of calvings that would have taken place by May 14 compared with the first week of June, when previous censuses were taken.

**(19) Pigs**

Due to response errors, data for the two weight categories of "All other pigs"—pigs under 45 lbs (20 kg) and pigs 45 lbs (20 kg) and over—have been combined.

**(20) Colonies of Bees**

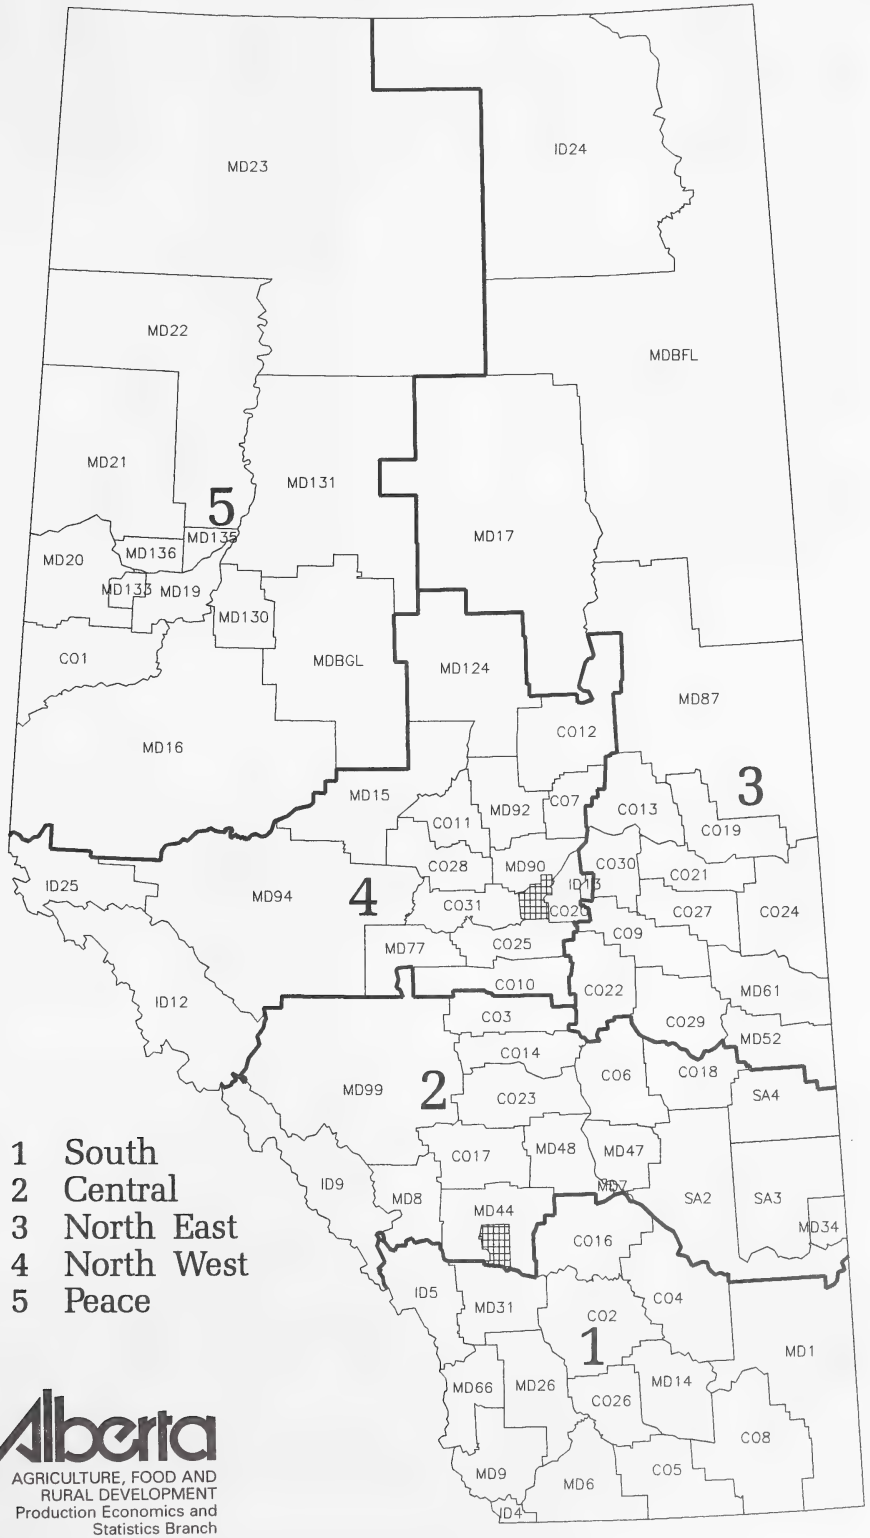

As in 1991, some undercoverage occurred in 1996 (primarily of smaller bee operations).

**(21) Poultry Production**

The 1995 production data reported for chickens (i.e., broilers, roasters and Cornish) and turkeys somewhat underestimate actual production on a liveweight basis because some producers reported on an eviscerated basis.

**Are any mushrooms being grown on this operation for sale?**

1 ○ **No** – **Skip to STEP 14**

2 ○ **Yes**

118. Will the area be reported in square feet or square metres? 3 ○ square feet **OR** 4 ○ square metres

| | Area |
|---|---|
| 119. **TOTAL growing area (standing footage) for mushrooms on May 14, 1996** | 364 |

## STEP 14

**Does this operation own any colonies of bees for the production of honey?**

1 ○ **No** – **Skip to STEP 15**

2 ○ **Yes** ▶ • **Include all colonies of bees owned, regardless of location.**

| | Number of colonies |
|---|---|
| 120. **In 1996,** how many colonies will be harvested for honey? | 372 |

## STEP 15

**Please answer the following questions about land management practices used on this operation.**

121. **In 1995,** what was the area of land on which each of the following inputs was used:

| | Area in 1995 | | Area in 1995 |
|---|---|---|---|
| Irrigation (application of water) | 380 | Insecticides | 383 |
| Commercial fertilizer | 381 | Fungicides | 384 |
| Herbicides | 382 | | |

122. Was manure applied to any land on this operation in 1995?

3 ○ No 4 ○ Yes ▶ **If Yes,** report the area of land on which manure was applied using each of the following methods:

| | Area in 1995 |
|---|---|
| Solid spreader | 387 |
| Irrigation (use of irrigation system to apply manure) | 388 |
| Liquid spreader - on surface | 389 |
| Liquid spreader - injected | 390 |

123. **In 1996,** which of the following practices were used: ***(Mark all applicable circles.)***

1 ○ Crop rotation
2 ○ Permanent grass cover
3 ○ Winter cover crops for spring plough-down
4 ○ Contour cultivation
5 ○ Strip-cropping
6 ○ Grassed waterways
7 ○ Windbreaks or shelterbelts

124. What is the area of land prepared or to be prepared for seeding **in 1996** using the following practices:

• **Include** the area that was prepared last fall or this spring.

| | Area in 1996 |
|---|---|
| **Tillage that incorporates most of the crop residue into the soil** | 398 |
| Tillage prior to seeding that **retains most of the crop residue on the surface** *(Include minimum tillage.)* | 399 |
| **No tillage** prior to seeding *(Include direct seeding into stubble or sod, and ridge tillage.)* | 400 |

125. If **summerfallow** land was reported in question 108, on page 9, what is the area on which each of the following forms of weed control will be used **in 1996:**

| | Area in 1996 |
|---|---|
| Chemical only | 401 |
| Tillage only | 402 |
| Tillage and chemical combination on the same land *(Do not include area already reported as "Chemical only" or "Tillage only".)* | 403 |

## STEP 16

**Are there any poultry on this operation on May 14, 1996?**

1 ○ No – Skip to STEP 17

2 ○ Yes ▶
- Report all poultry on this operation, **regardless of ownership**, including those grown under contract.
- **Do not** include poultry owned but kept on an agricultural operation operated by someone else.

| Hens and chickens | Number of birds |

| 197. **During 1995**, what was the **total number of weeks** of paid labour: | Total weeks |
|---|---|
| – worked on a **year-round basis** | 622 |
| – worked **on a seasonal or temporary basis** | 623 |

## Reasons why questions are asked

**Step 1** asks about your farm as a business. This information tells us how Canadian farms are organized and owned.

**Step 2** asks about the farm's operators. Names and addresses are used to make sure all farms are included in the census and none are counted twice.

**Step 3** asks which standard measure of reporting land size you will use for the rest of the steps.

**Steps 4-15 and 26** ask about the land you farm. This information shows which crops are grown and in which areas. The questions on land management practices identify what methods are being used and the extent to which farmers are implementing various practices.

**Steps 16-19** ask you about the numbers of livestock and poultry on your farm. This information provides estimates on inventories and production available for domestic consumption and export.

**Steps 20 and 21** ask about the market value of your farm and the machinery you use.

This information shows where certain types of farm machinery and equipment are used. This information helps businesses market their products and services.

**Steps 22 and 23** ask about your farm's expenses and revenues and help us study farms of different financial sizes. Farm programs are developed and evaluated based on this information. Farm associations use this information to find out how farms are doing financially and to make representation to legislators and the public.

**Step 24** asks about recent additions or purchases made for your farm. This information is used to monitor investment in farms.

**Step 25** asks about your use of computers. This information will help decide how farmers get government services and information in the future.

**Step 27** asks about your hired labour. This information is used to plan and develop training programs for farm workers.

## The law protects what you tell us

The confidentiality of your Census of Agriculture form is protected by law. This means that only Statistics Canada employees who work with census data and have taken an oath of secrecy see your form. Your personal census information cannot be given to anyone outside Statistics Canada - not the police, not another government department, not another person. This is your right.

You can ask to see the information you gave about your farm on your 1996 Census of Agriculture form after November 1996. To do this, write to the Privacy Co-ordinator, Statistics Canada, 25th Floor, R.H. Coats Building, Ottawa, Ontario, K1A 0T6.
